

Redefining Outdoor Living

Trex®

The world's #1 brand of wood-composite decking

From small renovations to large-scale builds, professionals rely on Trex for consistent quality and dependable limited warranties.

Supported by a wide network of distributors and dealers in the industry, Trex products are distributed and available in more than 6,700 retail locations around the globe.

With decades of innovation and industry recognition, Trex remains the trusted choice of professionals and continues to set the standard in composite decking.

*Trex is built around a simple idea:
outdoor living should be beautiful
and easy to maintain.*

Combining superior durability and aesthetics, Trex outdoor living products offer a wide range of style options.

Our composite boards are performance-engineered to take on sun, weather, and everyday use without the upkeep demands of wood.

Unlike many other composites and decking materials in the market, high performance Trex decking resists mould, and won't rot, warp, crack, flake, or splinter.

Thanks to its proprietary shell, low-maintenance Trex decking never needs sanding, staining or painting. Just an occasional soap-and-water cleaning is all that's needed to retain a like-new appearance.

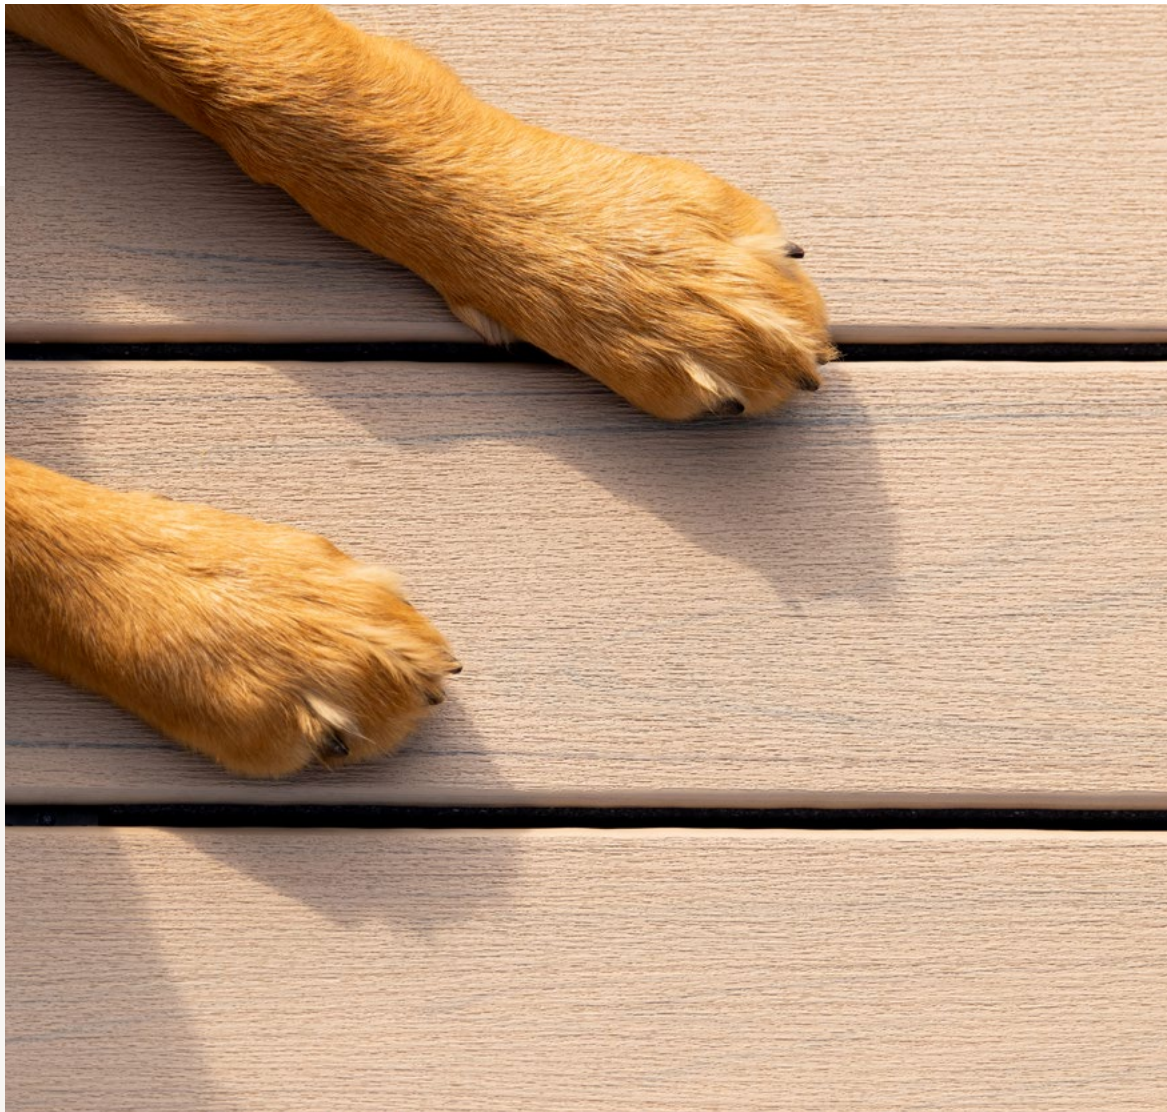

*Made from 95% recycled
and reclaimed materials*

Trex® uses recycled plastic film and reclaimed wood to create environmentally-friendly products.

Being one of the largest plastic film recyclers in North America, our entire high-performance composite decking portfolio is manufactured using 95% recycled and reclaimed materials.

Since our founding, we have upcycled more than 6.4 billion pounds of waste plastic film, transforming what was once discarded into beautiful, long-lasting outdoor living spaces.

Designed to be different

Our high-performance boards are engineered to resist fading*, scratches and stains** and reduce time-consuming maintenance.

TREX VS WOOD

RESISTS MOULD, MILDEW, WARPING, SPLINTERING, CRACKING, ROT AND DECAY

LOW MAINTENANCE

NO SANDING, STAINING OR SEALING REQUIRED – EVER!

SUSTAINABLY MADE

USING 95% RECLAIMED AND RECYCLED MATERIALS

DURABLE

FADE* AND STAIN RESISTANT**

EASY CLEAN

SUNCOMFORTABLE™ TECHNOLOGY

*With SunComfortable Technology, raise the bar, not the temperature**

Trex SunComfortable Technology redefines what performance looks like in the heat. This heat-mitigating technology reduces heat absorption, keeping Trex deck surfaces cooler* than our original boards.

MARINE-GRADE DECKING

100% submersible decking built to last.

Our mould- and mildew-resistant boards can be submerged for extended periods—even multiple times a day with rising tides—without warping, splintering, rotting, or decaying.

TREX HIDEAWAY® COLLECTION

Trex Hideaway® Hidden Fastener System

Compatible with our grooved decking boards, Trex Universal Hidden Fasteners deliver a beautiful finish and seamless look, above and beyond.

*Trex® decking with SunComfortable™ Technology stays cooler than our original boards, but like all decking, it will get hot in direct sun on hot days, especially darker colours. Care should be taken to avoid extended contact between exposed skin and the deck surface, especially with young children and those with additional needs.

*Composite decking
designed for
lasting beauty and
everyday ease.*

SUNCOMFORTABLE™ HEAT-MITIGATING* TECHNOLOGY
With SunComfortable™ Technology, we've achieved a major innovation. Engineered to be cooler* than our original boards.

*Trex® decking with SunComfortable™ Technology stays cooler than our original boards, but like all decking, it will get hot in direct sun on hot days, especially darker colours. Care should be taken to avoid extended contact between exposed skin and the deck surface, especially with young children and those with additional needs.
